

### **Traumatic Brain Injury Fund**

Uses of appropriation request:

75 to 80 percent directly to people in resource facilitation and neuropsych evaluation.

10 to 15 percent to professional and public training.

Balance to information and outreach to help people and families know how to access the fund.

The advisory board will meet after the session and recommend exact amounts.

Based on the TBI Fund Advisory Board reports of past services, we project that we could provide Resource Facilitation support to over 600 TBI survivors, and could train over 5000 community members and train 500 professionals.
